## **Problem Statement**

Time Management

**What is the Problem?** People are too overwhelmed with their schedules and can't keep up with their responsibilities. They arrive late to their appointments because they can't time how long it takes them to get there. They feel like they have little free time when in reality they're just managing their time poorly and wasting much of it.

**Who is experiencing the problem?** *Literally* everyone

**Where does the problem present itself?** In everyday life. People constantly struggle with time management whether it's in college, high school, or in the workforce.

**Why does it matter?** Time management is an important skill that people must have in order to function *efficiently* in modern society.
